DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 8, 10, 12, 16-18, 23, 25, 27, 29, 31, 33, 35 and 37, drawn to a system and method for controlling the start-up of a computer system using password, classified in class 713, subclass 202.
 - II. Claims 4-7, 9, 11, 13-15, 19-22, 24, 26, 28, 30, 32, 34, 36 and 38, drawn to a system and method for controlling access to secondary storage, classified in class 713, subclass 202 and class 711, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed (group II) does not require the particulars of the subcombination as claimed (group I) because it does not require a startup password for the main unit of the information processor. The subcombination has separate utility such as controlling the start-up of a computer system.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Michael Huppert on 11/01/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
